

Quick Reference Table Crisp Head Lettuce

Variety	Type	Maturity* (days from transplant)	Season	Head size*	Colour*	Butt core*	Head solidity*	Bolting reaction*	Disease reaction #		Comment
									Bl	Pb	
Silvana	Iceberg lettuce	60 - 70	Spring, summer & autumn	Medium-large	Dark green	Medium	Good	Slow			Only for autumn to spring production. Plants are very uniform. Heads are big and have a good size frame
Supreme Plus	Iceberg lettuce	55 - 60	Spring, summer & autumn	Medium-large	Medium green	Small	Good	Slow	HR		Only for autumn to spring production
SV7735	Iceberg lettuce	55 - 60	Spring, summer & autumn	Medium-large	Medium green	Small	Good	Slow			Excellent uniformity, colour and taste
Taina	Crisp head lettuce	60 - 65	Warm season	Medium-large	Medium dark green	Medium	Very good	Slow			Excellent results are consistently achieved in sub-tropical regions

* Characteristics given are affected by production methods such as soil type, nutrition, planting population, planting date and climatic conditions. Please read disclaimer..

Disease reaction key:

IR: Intermediate resistance HR: High resistance

Abbreviation	Common disease name	Pathogen name
Bl	Downy mildew	<i>Bremia lactucae</i>
Pb	Lettuce root aphid	<i>Pemphigus bursarius</i>

Disclaimer: This information is based on our observations and/or information from other sources. As crop performance depends on the interaction between the genetic potential of the seed, its physiological characteristics, and the environment, including management, we give no warranty express or implied, for the performance of crops relative to the information given nor do we accept any liability for any loss, direct or consequential, that may arise from whatsoever cause. Please read the Sakata Seed Southern Africa (Pty) Ltd Conditions of Sale before ordering seed.

Resistance: is the ability of a plant variety to restrict the growth and development of a specified pest or pathogen and/or the damage they cause when compared to susceptible plant varieties under similar environmental conditions and pest or pathogen pressure. Resistant varieties may exhibit some disease symptoms or damage under heavy pest or pathogen pressure (HR = High resistance, IR = Intermediate resistance).

* **Experimental:** This variety does not appear on the current South African Variety list, but has been submitted for registration.

Recent version: Kindly contact Sakata or Area Representative for the most recent version of this Technical Bulletin.
