

OUTSTANDING QUALITIES

- ◆ DELICATE FLAVOUR
- ◆ WIDELY ADAPTED
- ◆ OBLONG SHAPE
- ◆ SCARLET RED WITH WHITE TIP

French Breakfast is a red radish that performs very well year-round. Maturity is medium, around 25 - 30 days from sowing. Roots are oblong in shape and have silky smooth shoulders and a refined tap root. Roots have a scarlet red skin colour with white tips. Yield potential is good. Field holding is good and **French Breakfast** tolerates pithing well. Foliage is medium to tall, healthy and dark green. The delicate taste and texture are very good. **French Breakfast** is used for quality bunching, salad packs and the pre-pack markets.

SPECIAL VARIETAL REQUIREMENTS

- Suitable for all year round production
- Contact area representative for more information

CHARACTERISTIC*	FRENCH BREAKFAST
TYPE	Red radish (<i>Raphanus sativus</i> L. var. <i>sativus</i> L.)
MATURITY	Medium (around 25 - 30 days from sowing)
SEASON	Year-round production
ROOT SHAPE	Oblong
DIMENSIONS	2.5 x 2.5 cm
SKIN COLOUR	Scarlet red with white tip
SMOOTHNESS	Very smooth
FLESH COLOUR	White
FLESH TEXTURE	Very firm, crisp
PITH RESISTANCE	Good
CRACK RESISTANCE	Fair
FLAVOUR	Delicate
TOP	Medium with strong foliage
TOP HEIGHT	10 - 15 cm
TOP COLOUR	Dark green
DISEASE REACTION (SCIENTIFIC)	-
FIELD HOLDING	Good
YIELD POTENTIAL	Very good
SUGGESTED POPULATION	10 - 12 kg per ha, 1.2 - 1.8 million seeds per ha
MARKET USE	Bunching, salad packs and pre-pack
SPECIAL FEATURES	Delicate taste and attractive shape and colour

* Characteristics given are affected by production methods such as soil type, nutrition, planting population, planting date and climatic conditions. Please read disclaimer.

Disclaimer: This information is based on our observations and/or information from other sources. As crop performance depends on the interaction between the genetic potential of the seed, its physiological characteristics, and the environment, including management, we give no warranty express or implied, for the performance of crops relative to the information given nor do we accept any liability for any loss, direct or consequential, that may arise from whatsoever cause. Please read the Sakata Seed Southern Africa (Pty) Ltd Conditions of Sale before ordering seed.

Resistance: is the ability of a plant variety to restrict the growth and development of a specified pest or pathogen and/or the damage they cause when compared to susceptible plant varieties under similar environmental conditions and pest or pathogen pressure. Resistant varieties may exhibit some disease symptoms or damage under heavy pest or pathogen pressure (HR = High resistance, IR = Intermediate resistance).

* **Experimental:** This variety does not appear on the current South African Variety list, but has been submitted for registration.
